PROFESSIONAL SUMMARY

Aspiring Backend & Data Engineer with strong hands-on experience in Java, Spring Boot, RESTful APIs, and scalable backend systems. Skilled in database design, SQL optimization, ETL pipelines, and cloud-based data processing using Google Cloud Platform and BigQuery. Passionate about building production-grade applications while leveraging strong database and data engineering fundamentals.

SKILLS

Languages: Java (Primary), Python, SQL

Backend: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, JWT Authentication

Databases: MySQL, PostgreSQL, Oracle SQL, PL/SQL, MongoDB, Google BigQuery

Query Optimization: Window Functions, CTEs, Complex Joins, Indexing Strategies

Data Engineering: ETL Pipelines, Data Warehousing, Data Modeling (3NF, Star Schema)

Tools & DevOps: Docker, Git, GitHub, Swagger/OpenAPI, Power BI

Cloud: Google Cloud Platform, AWS (Basics)

PROJECTS

PayStream – Payment Orchestration Platform

Oct – Dec 2024

Technologies: Spring Boot, PostgreSQL, Redis, JWT, Docker

- Architected a production-grade payment orchestration platform exposing 25+ REST APIs across authentication, wallets, transactions, and payment flows.
- Implemented JWT authentication, RBAC, Redis caching, and rate limiting for secure, high-performance API access.
- Engineered concurrent transaction handling using pessimistic locking and idempotency keys, eliminating duplicate payment risks.
- Integrated Flyway DB migrations and Resilience4j circuit breakers, improving system reliability and deployment safety.

TweetSense – Real-Time Twitter ETL Pipeline & Sentiment Analysis

Jan – Mar 2025

Technologies: GCP, BigQuery, Python, Power BI

- Built an end-to-end ETL pipeline on GCP ingesting, transforming, and loading Twitter data into BigQuery for real-time analysis.
- Reduced BigQuery query costs by 60% through partitioning and clustering strategies on a multi-million row dataset.
- Developed Power BI dashboards delivering real-time sentiment insights and trend visualization across tweet streams.
- Applied 3NF data modeling and validation to ensure clean, production-grade datasets.

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027 (Pursuing)

Bharati Vidyapeeth Institute of Management and Technology, Navi Mumbai

Bachelor of Science in Information Technology (BSc IT)

2022 – 2025 | CGPA: 8.75

Kishinchand Chellaram College, Mumbai

CERTIFICATIONS

HackerRank SQL Certification (April 2026) — Validated skills in querying, joins, aggregations, and subqueries.

HackerRank Java Certification (March 2026) — Demonstrated proficiency in OOP and core Java programming.
